Introducing the Tableau table crafted in stone. A natural material that elevates this sculptural design up to a new level

February 2019

Tableau is a sculptural table collection with lyrical geometric lines. Adding to the current version in wood, this new variant in stone reflects a passion for natural materials that runs deep in our design DNA.

Stone is a new addition to select products in our portfolio and Tableau is one of the first to be launched in stone, elevating the series to a new level.

For Tableau, it's quite an accomplishment to craft the table in stone, creating synergy with the soft-corned square top and the x-shaped base. Expert artisans are involved in precisely carving and polishing each piece to perfection.

Stone has a universal appeal that defies time. It has an innate elegance and exclusivity, with subtle unique differences in surface patterns.

Available in two versions, the Tableau series in stone makes for a subtle yet striking statement that's ideal a variety of venues. Such as private residences, as well as luxurious hotel lobbies, upscale restaurants, exclusive lounges, etc. Any interior where you want to signal effortless elegance.

“Tableau reflects our fascination with natural materials and approach to design based on intuition and emotion. Stone infuses any atmosphere with a calm sense of elegance.”

- Space Copenhagen

The Tableau series in stone will be available from July 2019.
