APRIL 2018

## NEWS:

### SPINE METAL BASE – MODERN LUXURY REDEFINED

**Fredericia presents Spine Metal Base designed by Space Copenhagen – a new series of chairs within the Spine collection, redefined with modern elegance.**

Since launching the collection in 2011 for a Copenhagen-based Michelin starred restaurant, Spine has grown into a wide selection of seminal chairs, barstools and sofas that now appear in deluxe bars, restaurants and hotels across the globe.

A clean and modern visual language characterises the Spine collection, and this latest addition of a metal base strengthens the stunning expression of the family. The simple lines of the metal leg infuse the chair with a sleekness that contrasts perfectly with the plush, fully-upholstered seat, creating a beautifully balanced design.

The new Spine Metal Base series consists of a dining chair, lounge chair, barstool with and without backrest and stool low. Each features a lean and elegant steel leg structure and a fully upholstered seat for maximum customisation and comfort.

#### **Designer's quote**

"Spine Metal Base - a rebirth of the ever classic wooden Spine collection. We simply loved the idea of a lighter version featuring the combination of steel and soft, comfortable upholstery. The collection of dining, bar and lounge chairs are all about elegant simplicity. They are all very easy to customize for different environments depending on the choices of textile and leathers." - Space Copenhagen

**Spine Metal Base is available from September 2018.**
